# FOOD ON WALKS

Taking food on walks and using it to reward your dog can be a little bit controversial and it's easy to be put off by people who accuse you of spoiling your dog.

For high prey drive dogs, many people believe that food rewards aren't useful at all BUT really, food is THE most useful tool you can have on you. Plus it's convenient and easy to use.

# HERE'S WHY

**1**

Food can reward your dog. And help them to calm down.

Food can help you understand how your dog is feeling.

**2**

**3**

Food can help you progress your training by acting as a distraction.

Food can help you to observe your dog so you get more success with them.

**4**
